

Dear Friends,

To everyone who stopped by our booth at NATA, thank you for taking the time to say hello! We always appreciate the opportunity to connect with our users, hear your stories, and help you get even more out of your SportsWare Online account. We truly enjoyed seeing you and look forward to catching up again next year!

In this issue:

- Feature Spotlight: Athlete Imports
- SPORTSWARE ONLINE Mobile Tip of the Month: Concussion Testing
- Insurance Verification: Catch Lapsed Insurance Before it's Needed
- Community Spotlight: Tell us Your Stories!

Looking for ways to ensure all of your a

ONLINE provides users with several options to confirm that everyone who is on the field for pre-season should be! Within the Standard Reports menu, select the "Attachments and Required Fields" report for a rundown of the status of each athlete attachment as well as required fields and medical history.

Feature Spotlight: Athlete Importer

There are several ways to create athlete accounts in SportsWare Online, but if you're looking to create or update hundreds of profiles at once, the **Import Athletes** feature is the way to go! For a complete list of importable fields and step-by-step instructions to ensure a successful import, click the link below.

SPORTSWARE ONLINE Mobile Tip of the Month: Concussion Testing

Did you know you can perform both the SCAT-6 and VOMS right from your mobile device? With the **Concussion Toolbox**, you'll also have access to the CRT-6, mBESS, and a Symptom Evaluation that athletes can complete on their own helping streamline the entire concussion evaluation process. 👉 [Set a Meeting to Discuss Mobile Options](#)

Community Spotlight - Tell us your Stories!

When a senior basketball player took a hard fall during practice and began having a seizure, Athletic Trainer Allison Pritchard was ready to respond. Her quick thinking and decisive action helped turn what could have been a tragedy into a story of preparedness.

and lifesaving care.

The [HUMAC NORM](#) Isokinetic Test Report makes it easy to see what you are treating so you can treat better. Isokinetic resistance set to the appropriate speed allows the patient to perform a maximum muscle capacity contraction at every point in the ROM. Deficits, see example, are easy to see which makes objective, evidence based treatment protocols possible. [Contact CSMi](#) for more info.

HUMAC BIKE

HUMAC NORM Owners use Isokinetic resistance training to increase strength because research has proven it's the most efficient resistance to build strength. Now the same Isokinetic resistance in the HUMAC NORM is available in the new [HUMAC BIKE](#) by GSDi.

Athletes with lower extremity injuries have a strong side and a weak side - - with the Isokinetic HUMAC BIKE both sides benefit simultaneously by simply pedaling harder. If your goal is to build strength, your athletes should be riding an Isokinetic bike i.e. HUMAC BIKE. Old timers -- think CYBEX EITRON

Other features: cordless, adjustable crank pedal length, low step through

The best new product feature ideas originate from our Users. If you have a [suggestion or a question](#) please let us know. Thank you for reading. Exercise!
