

Dear Friends,

As always, we are thrilled to have the opportunity to spend time with our SPORTSWARE ONLINE family at NATA! Come see us at booth 1309 for a sneak peek at what's coming next in SportsWare 2.0 and a pair of SWOL branded Trauma Shears!

In this issue:

- End of Year Reporting
- Feature Spotlight: Centric Database
- SPORTSWARE ONLINE Mobile Tip of the Month: Registration from Mobile
- Insurance Verification: Updated Instructions
- Community Spotlight: Tell us Your Stories!

End of Year: Reporting

As we enter the Summer season, it is time to look at our year in review! SPORTSWARE ONLINE features a robust set of reporting tools to allow users to review information and gather statistics from any database in minutes. For a rundown of how standard reporting tools operate in SWOL click below. From the standard reporting set Statistics (Group), CPT Billing, and Treat/Injury are always a solid place to get started!

👉 [Click to Review Generation of Standard Reports](#)

Feature Spotlight: Centric Database

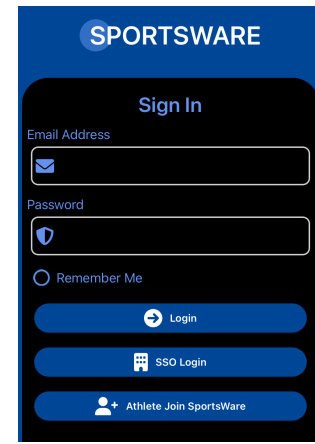

Tired of popping between databases to review injuries, treatments, or other associated records? The Centric Database provides users with an easy way to review all records associated with an individual athlete, a full team, or an entire group, without having to flip back and forth between screens!

👉 [Click for a review of how to navigate the Centric tab](#)

SPORTSWARE ONLINE Mobile Tip of the Month: Registration from Mobile

Did you know that Athletes and Parents can now complete their full profile, directly from SPORTSWARE Mobile? Share QR codes with Parents and Athletes to give them a direct link to the "Join SportsWare" button to collect demographic data, medical alerts, insurance information, and more! To download updated Athlete and Parent instructions, click the link below!

👉 [Click for Updated Athlete and Parent Instructions](#)

Download Mobile for Android

Download Mobile for Apple Device

Insurance Verification: No More Unexpected Bills!

Avoid unexpected medical bills by verifying athlete insurance ahead of time! Insurance Verification in SPORTSWARE ONLINE will ping your athlete's insurance on a monthly basis and make it easy to dump a report of athletes with lapsed plans.

Community Spotlight - Tell us your Stories!

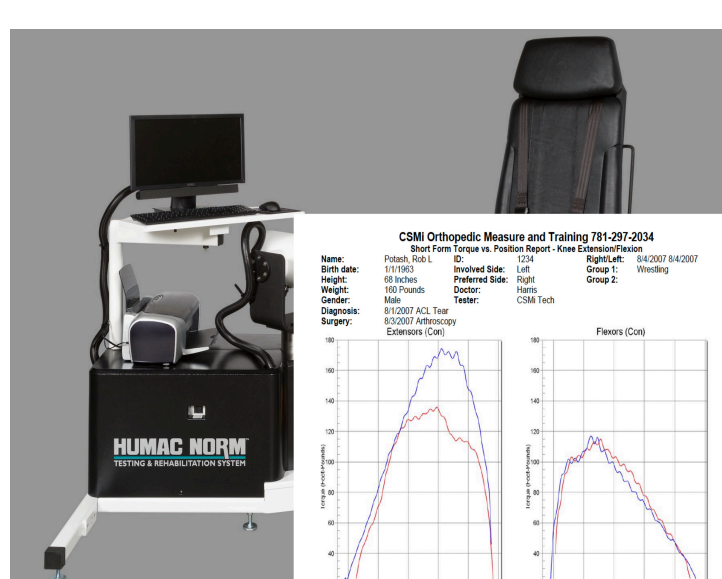

Another day in the athletic training room nearly turned to panic when the father of a visiting team's player collapsed in the stands. Due to her quick reaction, "Save-the-Day Shea" was able to prevent a tragedy!

HUMAC NORM - See What You Are Treating

The [HUMAC NORM](#) Isokinetic Test Report makes it easy to see what you are treating so you can treat better. Isokinetic resistance set to the appropriate speed allows the patient to perform a maximum muscle capacity contraction at every point in the ROM. Deficits, see example, are easy to see which makes objective, evidence based treatment protocols possible. [Contact CSMi](#) for more info.

HUMAC BIKE

HUMAC NORM Owners use Isokinetic resistance training to increase strength because research has proven it's the most efficient resistance to build strength. Now the same Isokinetic resistance in the HUMAC NORM is available in the new [HUMAC BIKE](#) by CSMi.

Athletes with lower extremity injuries have a strong side and a weak side - - with the Isokinetic HUMAC BIKE both sides benefit simultaneously by simply pedaling harder. If your goal is to build strength, your athletes should be riding an Isokinetic bike i.e. HUMAC BIKE. Old timers -- think CYBEX FITRON.

Other features: cordless, adjustable crank pedal length, low step through

The best new product feature ideas originate from our Users. If you have a [suggestion or a question](#) please let us know. Thank you for reading. Exercise!

- Rich and Rob
